Storage Instructions

If metal roofing or siding is not going to be used immediately, it should be stored in a dry area. It should be unbundled and stood on end against an interior wall. If materials must be stored outside, protect with canvas or waterproof paper. Allow for air circulation, do not cover air-tight.

Application precautions

Avoid installing directly over green or damp lumber, porous insulation or other damaging materials. The use of a moisture barrier is recommended in such situations. Strong chemicals, such as fertilizer, manure and lime may cause damage. Storage or application near such materials should be avoided.
